Synesys Group CISSP® Boot Camps

Synesys Group CISSP boot camps are *distinct* in several ways:

- Printed and bound slide deck optimized for subsequent study, with detailed content such as definitions already included to eliminate furious note taking
- *Thermometer-icons^{TM}* on slides, estimating likelihood of content on exam, plus statistical weighting of domains
- An electronic copy of *"CISSP Questions with Answers and Explanations in Both Test Mode and Study Mode"* book which explains every answer, not just the correct answer, coaches with *Test Tips* and *Memory Hints*, and includes questions that in addition to exam practice teach and reinforce the art of question answering
- Exam practice throughout, using multiple sources of questions, new "Drag and Drop" and "Hotspot" question styles, and sub-domain practice instead of waiting until end of the domain
- Use of TurningPoint electronic clickers to engage every attendee on every practice question (when available)
- Expert guidance on managing exam stress, even for the new aggressively adaptive exam
- Expert guidance on structure and style of exam, examining test questions and answers, and maximizing exam score – including new Computerized Adaptive Testing (CAT)
- Expert guidance on maximizing study effectiveness while minimizing study time
- Plus, typically one to three commercial CISSP study and/or practice question books
- Extensive electronic information security library including complete slide deck and glossaries useful for exam prep and professional reference
- Daily written evaluations to optimize experience for each unique group

Synesys Group CISSP boot camps:

- Are excellent as starting point or capstone for exam study, abundantly equipping for further study, *or* as an intense overview of cybersecurity for those who may never take the exam
- Are taught by a pioneer in the field with solid academic and professional credentials who has actually worked in every CISSP domain and conducted hundreds of highly-evaluated CISSP boot camps and webinars
- Are a perfect match for TechRepublic's guidance on finding quality CISSP training (http://techrepublic.com/article/six-tips-for-finding-quality-cissp-training/)
- Can be customized to any particular organization, industry, or schedule; on-site or online

Written evaluations from boot camps as well as recommendations on LinkedIn are available attesting to the excellence. 20% of income and time are given back to the community.
